SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549**

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the Quarterly Period Ended September 30, 2011

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

ARMOUR RESIDENTIAL REIT, INC.

(Exact name of registrant as specified in its charter)

Maryland

(State or other jurisdiction of incorporation or
organization)

001-33736

(Commission File Number)

26-1908763

(I.R.S. Employer Identification No.)

3001 Ocean Drive, Suite 201, Vero Beach, FL 32963

(Address of principal executive offices)(zip code)

(772) 617-4340

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding twelve months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding twelve months (or for such shorter period that the registrant was required to submit and post such files). Yes NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

The number of outstanding shares of the Registrant's common stock as of November 2, 2011 was 84,766,397.

ARMOUR Residential REIT, Inc. and Subsidiaries
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2011
(Unaudited)

Note 1 – Basis of Presentation

The consolidated balance sheet as of December 31, 2010, which has been derived from the audited financial statements, and the unaudited financial statements included herein have been prepared from the books and records of ARMOUR Residential REIT, Inc. (“the Company”) pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”) for reporting in the Quarterly Report on Form 10-Q. The information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the U.S. (“GAAP”) have been condensed or omitted pursuant to such rules and regulations. The interim consolidated financial information should be read in conjunction with the audited financial statements and notes thereto for the year ended December 31, 2010, which are filed on Form 10-K.

The Company’s management is responsible for this interim consolidated financial information. Interim results may not be indicative of the results that may be expected for the year. However, we believe that all adjustments considered necessary for a fair presentation of this financial information have been included and are of a normal and recurring nature.

Note 2 - Organization and Nature of Business Operations

Business

References to “we”, “us”, “our”, “ARMOUR” or the “Company” are to ARMOUR Residential REIT, Inc. References to “ARRM” are to ARMOUR Residential Management LLC, a Delaware limited liability company. References to “Enterprise” are to Enterprise Acquisition Corp., which is a wholly-owned subsidiary of ARMOUR.

We are an externally-managed Maryland corporation organized in 2008, managed by ARRM. We invest primarily in hybrid adjustable rate, adjustable rate and fixed rate residential mortgage backed securities issued or guaranteed by a U.S. Government-chartered entity, such as the Federal National Mortgage Association (more commonly known as Fannie Mae) and the Federal Home Loan Mortgage Corporation (more commonly known as Freddie Mac), or guaranteed by the Government National Mortgage Administration, a U.S. Government corporation (more commonly known as Ginnie Mae) (collectively, “Agency Securities”). From time to time, a portion of our portfolio may be invested in unsecured notes and bonds issued by U.S. Government-chartered entities (collectively, “Agency Debt”), U.S. Treasuries and money market instruments, subject to certain income tests we must satisfy for our qualification as a real estate investment trust (“REIT”).

We intend to qualify and have elected to be taxed as a REIT under the Internal Revenue Code (“the Code”). Our qualification as a REIT depends on our ability to meet, on a continuing basis, various complex requirements under the Code relating to, among other things, the sources of our gross income, the composition and values of our assets, our distribution levels and the concentration of ownership of our capital stock. We believe that we are organized in conformity with the requirements for qualification as a REIT under the Code and our manner of operations enables us to meet the requirements for taxation as a REIT for federal income tax purposes.

As a REIT, we will generally not be subject to federal income tax on the REIT taxable income that we currently distribute to our stockholders. If we fail to qualify as a REIT in any taxable year and do not qualify for certain statutory relief provisions, we will be subject to federal income tax at regular corporate rates. Even if we qualify as a REIT for federal income tax purposes, we may still be subject to some federal, state and local taxes on our income.

Note 3 - Summary of Significant Accounting Policies

Basis of Presentation and Consolidation and Use of Estimates

Our financial statements are presented in U.S. dollars in conformity with GAAP. The condensed consolidated financial statements include the accounts of ARMOUR and all subsidiaries; all intercompany accounts and transactions have been eliminated.

The preparation of financial information in conformity with GAAP requires management to make estimates that affect the reported assets and liabilities at the date of the balance sheet and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

ARMOUR Residential REIT, Inc. and Subsidiaries
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2011
(Unaudited)

Reclassification

We reclassified previously presented financial information to conform to the presentation in our condensed consolidated financial information as of and for the three and nine month periods ended September 30, 2011. Accrued interest payable, which was previously included in the caption “accounts payable and accrued expenses”, has been reclassified and is presented in a separate item. Previously included in accounts payable and accrued expenses was accrued interest receivable and payable with respect to our interest rate swap contracts which was previously netted, and has been reclassified to accrued interest receivable and accrued interest payable, as applicable. Certain commissions with respect to Futures Contracts which were previously included in interest expense have been reclassified into realized gain or loss on those contracts. The unrealized gains and losses on our derivatives previously classified on our statement of operations as an adjustment to arrive at “net interest income after change in fair value of interest rate contracts” is no longer presented as an adjustment to interest income and has been reclassified into “other income” as part of the unrealized gain or loss on derivatives. This reclassification caused accrued interest receivable to increase by \$15,401 and accrued interest payable to increase by \$295,005, respectively for the period ending December 31, 2010. This reclassification also caused interest expense to decrease by \$9,874 and \$30,309 and other income (loss) to decrease by the same amounts, respectively for the three and nine months ended September 30, 2010. In addition, amounts previously reported for the six months ended June 30, 2011 have been reclassified. For the six months ended June 30, 2011 \$7,560,821 of interest expense has been reclassified to realized loss on derivatives within other income (loss) for the nine months ended September 30, 2011.

Cash

Cash includes cash on deposit with financial institutions and investments in high quality overnight money market funds, all of which have maturities of three months or less, at time of purchase. We may maintain deposits in federally insured financial institutions in excess of federally insured limits. However, management believes we are not exposed to significant credit risk due to the financial position and creditworthiness of the depository institutions in which those deposits are held.

Restricted Cash

Restricted cash at September 30, 2011 and December 31, 2010, represents approximately \$129.9 million and \$4.7 million, respectively, held by counterparties as collateral.

Agency Securities, at Fair Value

We invest primarily in Agency Securities. A portion of our portfolio may be invested in Agency Debt, U.S. Treasuries and money market instruments, subject to certain income tests we must satisfy for our qualification as a REIT. We have committed ourselves to the Agency asset class by including in our charter a requirement that all of our financial instrument investments will consist of Agency Securities, Agency Debt, U.S. Treasuries and money market instruments (including reverse repurchase agreements) and hedging and other derivative instruments related to the foregoing investments.

We classify our Agency Securities as either trading, available for sale or held to maturity securities. Although we generally intend to hold most of our Agency Securities for long-term periods, we may, from time to time, sell any of our Agency Securities as part of our overall management of our portfolio. Management determines the appropriate classifications of the securities at the time they are acquired and evaluates the appropriateness of such classifications at each balance sheet date. As of September 30, 2011, all of our Agency Securities were classified as available for sale. Agency securities classified as available for sale are reported at estimated fair value, based on fair values obtained and compared to independent sources, with unrealized gains and losses excluded from earnings and reported as a separate component of stockholders’ equity. Agency securities transactions are recorded on the trade date. Realized gains and losses on sales of Agency Securities are determined using the specific identification method.

We evaluate securities for other than temporary impairment at least on a quarterly basis and more frequently when economic or market concerns warrant such evaluation. We determine if we (1) have the intent to sell the Agency Securities, (2) are more likely than not that we will be required to sell the securities before recovery, or (3) do not expect to recover the entire amortized cost basis of the Agency Securities. There was no other than temporary impairment for the nine month period ended September 30, 2011 or for the year ended December 31, 2010.

Fair Value of Financial Instruments

The carrying amounts of cash, restricted cash, accrued interest receivable and accounts payable approximate their fair value due to the short maturities of these instruments. See Notes 5 and 6, respectively, for discussion of the fair value of Agency Securities, Available for Sale and Derivatives. The carrying amount of repurchase agreements and accrued interest payable is deemed to approximate fair value due to the short-term maturities of these instruments.

Agency Security Valuation

Agency Securities are valued using third-party pricing services and dealer quotes. If the fair value of a security is not available from the independent pricing service, or such data appears unreliable, we obtain valuations from up to three dealers who make markets in similar financial instruments. Management reviews pricing used to ensure that current market conditions are properly represented. The resulting unrealized gains and losses are reflected in our condensed consolidated balance sheets as accumulated other comprehensive income (loss).

Repurchase Agreements

We finance the acquisition of our Agency Securities through the use of repurchase agreements. Our repurchase agreements are secured by our Agency Securities and bear interest rates that have historically moved in close relationship to the London Interbank Offered Rate ("LIBOR"). Under these agreements, we sell securities to a lender and agree to repurchase the same securities in the future for a price that is higher than the original sales price. The difference between the sales price that we receive and the repurchase price that we pay represents interest paid to the lender. Although structured as a sale and repurchase obligation, a repurchase agreement operates as financing under which we pledge our securities as collateral to secure a loan which is equal in value to a specified percentage of the estimated fair value of the pledged collateral. We retain beneficial ownership of the pledged collateral. At the maturity of a repurchase agreement, we are required to repay the loan and concurrently receive back our pledged collateral from the lender or, with the consent of the lender, we may renew such agreement at the then prevailing financing rate. The repurchase agreements may require us to pledge additional assets to the lender in the event the estimated fair value of the existing pledged collateral declines.

Derivatives

We seek to economically hedge the exposure to potential interest rate mismatches between the interest earned on investments and the borrowing costs caused by fluctuations in short-term interest rates. In a simple interest rate swap, one investor pays a floating rate of interest on a notional principal amount and receives a fixed rate of interest on the same notional principal amount for a specified period of time. Alternatively, an investor may pay a fixed rate and receive a floating rate. During the term of the interest rate swap, we make or receive periodic payments and unrealized gains or losses are recorded as a result of marking the swaps to their fair value. If a swap is terminated prior to maturity, we record a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and our cost basis in the contract, if any. Any realized gains or losses are reported under realized gain (loss) on derivatives in our condensed consolidated statement of operations. All unrealized gains or losses are reported under unrealized gain (loss) on derivatives in our condensed consolidated statements of operations. Periodic payments are reported as other income (loss) under the heading of realized loss on derivatives on our condensed consolidated statement of operations. Interest rate swap contracts involve a risk that interest rates will move contrary to our expectations, which may reduce the periodic payments we receive or increase our payment obligations.

We are exposed to credit loss in the event of nonperformance by the counterparty to the swap, limited to any gains recognized. However, as of September 30, 2011, we did not anticipate nonperformance by any counterparty. Should interest rates move unexpectedly, we may not achieve the anticipated benefits of the interest rate swaps and may realize a loss.

We recognize all derivative instruments as either assets or liabilities at fair value on our condensed consolidated balance sheets. We do not designate our hedging activities as cash flow hedges, which, among other factors, would require us to match the pricing dates of both hedging transactions and repurchase agreements. Operational issues and credit market volatility make such matching impractical for us. Since we will not qualify for hedge accounting treatment as prescribed by GAAP, our operating results may reflect greater volatility than otherwise would be the case, because gains or losses on the interest hedging may not be offset by changes in the fair value or cash flows of the transaction within the same accounting period, or ever. Consequently, any declines in the fair value of our derivatives result in a charge to earnings. We will continue to designate hedging activities as hedges for tax purposes and any unrealized gains or losses should not affect our distributable net income. This tax designation has no impact on GAAP financial reporting.

ARMOUR Residential REIT, Inc. and Subsidiaries
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2011
(Unaudited)

Accrued Interest Receivable and Payable

Accrued interest receivable includes interest prepaid on purchased agency securities, interest accrued between payment dates on such securities and interest receivable on our derivatives. Accrued interest payable includes interest payable on our repurchase agreements and on our derivatives.

Credit Risk

We have limited our exposure to credit losses on our portfolio of Agency Securities by only purchasing securities issued by Freddie Mac, Fannie Mae or Ginnie Mae. The payment of principal and interest on the Freddie Mac and Fannie Mae Agency Securities are guaranteed by those respective agencies, and the payment of principal and interest on the Ginnie Mae Agency Securities are backed by the full faith and credit of the U.S. Government.

In September 2008, both Freddie Mac and Fannie Mae were placed in the conservatorship of the United States government. While it is hoped that the conservatorship will help stabilize Freddie Mac's and Fannie Mae's losses and overall financial position, there can be no assurance that it will succeed or that, if necessary, Freddie Mac or Fannie Mae will be able to satisfy their guarantees of Agency Securities. On August 5, 2011, Standard & Poor's Corporation downgraded the U.S.'s credit rating from AAA to AA++, and on August 8, 2011, Fannie Mae and Freddie Mac's credit ratings were downgraded from AAA to AA+. Because Fannie Mae and Freddie Mac are in conservatorship of the U.S. Government, the U.S.'s credit rating downgrade and Fannie Mae and Freddie Mac's credit rating downgrades will impact the credit risk associated with Agency Securities and, therefore, may decrease the value of the Agency Securities in our portfolio.

Market Risk

Weakness in the mortgage market may adversely affect the performance and market value of our investments. This could negatively impact our net book value. Furthermore, if our lenders are unwilling or unable to provide additional financing, we could be forced to sell our Agency Securities at an inopportune time when prices are depressed.

Preferred Stock

We are authorized to issue 25,000,000 shares of preferred stock, par value \$0.001 per share, with such designations, voting and other rights and preferences as may be determined from time to time by our Board of Directors ("Board") or a committee thereof.

Common Stock and Warrants

At September 30, 2011, we were authorized to issue up to 500,000,000 shares of common stock, par value \$0.001 per share. We had 84,758,505 shares of common stock issued and outstanding. At September 30, 2011, we had outstanding warrants to purchase 32,500,000 shares of common stock, which are exercisable at \$11.00 per share and expire in 2013.

Income per Common Share

Basic income per common share for all periods is computed by dividing the earnings applicable to common stockholders by the weighted average number of common shares outstanding for the period. The basic and diluted income per common share for the three and nine month periods ended September 30, 2011 and September 30, 2010, does not include 32,500,000 of outstanding warrants as the effect of including such warrants would be anti-dilutive. Diluted income per share would reflect the potential dilution assuming common shares were issued upon the exercise of outstanding warrants and the proceeds thereof were used to purchase common shares at the average market price during the period. Due to the net loss for the three and nine month periods ended September 30, 2011 and September 30, 2010, basic and diluted income per common share are equal.

Comprehensive Income

Other comprehensive income refers to revenue, expenses, gains and losses that are recorded directly as an adjustment to shareholders' equity. Other comprehensive income arises primarily from changes in unrealized gains or losses generated from changes in market values of our Agency Securities held as available for sale.

Revenue Recognition

Interest income is earned and recognized based on the outstanding principal amount of the investment securities and their contractual terms. Premiums and discounts associated with the purchase of investment securities are amortized or accreted into interest income over the actual lives of the securities.

Income Taxes

We intend to qualify and have elected to be taxed as a REIT under the Code. We will generally not be subject to federal income tax to the extent that we distribute our taxable income to our shareholders, and as long as we satisfy the ongoing REIT requirements including meeting certain asset, income and stock ownership tests.

Our management is responsible for determining whether a tax position taken by us is more likely than not to be sustained on its merits. We have no material unrecognized tax benefits and have not recognized in these financial statements any interest or penalties related to income taxes. Should any such penalties and interest be recognized, they will be included in other expenses and interest expense, respectively. None of our returns have been examined by federal, state or local authorities; therefore all years which are statutorily open are subject to examination by the appropriate authorities.

Note 4 - Recent Accounting Pronouncements

In April 2011, the FASB issued amendments to authoritative guidance related to the accounting for repurchase agreements and other agreements that entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. These amendments eliminate the criteria to assess whether a transferor must have the ability to repurchase or redeem the financial assets in order to demonstrate effective control over the transferred asset. Transferors that maintain effective control over a transferred asset are required to account for the transaction as a secured borrowing rather than a sale. These amendments are effective for annual and interim periods beginning after December 15, 2011 and are to be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. We do not anticipate that the application of this amended guidance will have a material impact on our financial statements.

In May 2011, the FASB issued amendments to authoritative guidance to establish common fair value measurement and disclosure requirements in GAAP and International Financial Reporting Standards (“IFRSs”). These amendments change the wording used to describe many of the requirements in GAAP for measuring fair value and for disclosing information about fair value measurements to ensure consistency between GAAP and IFRSs as well as expand the disclosures for Level 3 measurements. These amendments are to be applied prospectively, and are effective for annual and interim periods beginning after December 15, 2011. We do not anticipate that the adoption of this amended guidance will materially expand disclosures in our financial statements.

In June 2011, the FASB issued an amendment to authoritative guidance which allows an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This amendment eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders’ equity, but does not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The provisions of this amendment require retrospective application, and are effective for annual and interim periods beginning after December 15, 2011. We anticipate that the adoption of this amended guidance will change the presentation of our financial statements.

Note 5 - Agency Securities, Available for Sale

All of our Agency Securities are classified as available for sale and, as such, are reported at their estimated fair value. Management generally determines the fair values of Agency Securities by using third-party pricing services and dealer quotes. Management reviews pricing used to ensure that current market conditions are represented. At September 30, 2011 and December 31, 2010, all of our Agency Security values were based solely on third-party sources.

- (1) The current face is the current monthly remaining dollar amount of principal of an Agency Security. We compute current face by multiplying the original face value of the security by the current principal balance factor. The current principal balance factor is a fraction, where the numerator is the current outstanding balance and the denominator is the original principal balance.
- (2) For a pass-through certificate, the coupon reflects the weighted average nominal rate of interest paid on the underlying mortgage loans, net of fees paid to the servicer and the agency. The coupon for a pass-through certificate may change as the underlying mortgage loans are prepaid.
- (3) Amortized purchase price is the dollar amount, per \$100 of current face, of our purchase price for the security, adjusted for amortization as a result of scheduled and unscheduled principal repayments.
- (4) Amortized cost is our total purchase price for the Agency Security, adjusted for amortization as a result of scheduled and unscheduled principal repayments.
- (5) Market price is the dollar amount of market value, per \$100 of nominal, or face value, of the Agency Security. We value our Agency Securities using a third-party pricing service whose pricing model incorporates common market pricing methods. Management reviews the pricing to ensure that current market conditions are properly represented.
- (6) Market value is the total market value for the security.

As of September 30, 2011, we had committed to purchase securities for settlements in October and November of 2011. The information below was current as of September 30, 2011, but subject to change due to amortization prior to settlement. In addition, some forward trades of new issue securities are subject to modest changes in delivery size and coupon.

As of September 30, 2011 and December 31, 2010, the adjustable and hybrid adjustable rate mortgage loans underlying our Agency Securities have fixed-interest rates for an average period of approximately 68 months and 64 months, respectively, after which time the interest rates reset and become adjustable. After a reset date, interest rates on our adjustable and hybrid adjustable Agency Securities float based on spreads over various indices, typically LIBOR or the one-year Constant Maturity Treasury (“CMT”), rate. These interest rates are subject to caps that limit the amount the applicable interest rate can increase during any year, known as an annual cap, and through the maturity of the security, known as a lifetime cap.

The following table presents the gross unrealized losses and estimated fair value of our Agency Securities by length of time that such securities have been in a continuous unrealized loss position at September 30, 2011 and December 31, 2010.

As of	Less than 12 months		12 Months or More		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
September 30, 2011	\$ 1,219,654,037	\$ (3,380,556)	\$ 3,416,148	\$ (23,236)	\$ 1,223,070,185	\$ (3,403,792)
December 31, 2010	706,575,108	(7,873,009)	-	-	706,575,108	(7,873,009)

The decline in value of these securities is solely due to market conditions and not the quality of the assets. All of the Agency Securities are “Aaa/AA+” rated or carry an implied “Aaa/AA+” rating. The investments are not considered other than temporarily impaired because we currently have the ability and intent to hold the investments to maturity or for a period of time sufficient for a forecasted market price recovery up to or beyond the cost of the investments and we are not required to sell for regulatory or other reasons. Our ability to hold these securities to maturity would be impaired if we lost our access to financing or our cash flows were insufficient to fund our operations. Also, we are guaranteed payment of the principal amount of the securities by the U.S. Government-chartered entity which created them.

Note 6 - Derivatives

We enter into transactions to manage our interest rate risk exposure. These transactions include purchasing or selling Eurodollar Futures Contracts (“Futures Contracts”) as well as purchasing or selling interest rate swap contracts. These transactions are designed to lock in funding costs for financing activities associated with our assets in such a way to help assure the realization of attractive net interest margins. Such transactions are based on assumptions about prepayments which, if not realized, will cause transaction results to differ from expectations. We do not designate our activities as cash flow hedges, and as such, we recognize changes in the market value of these transactions through earnings (See Note 3). For the three and nine months ended September 30, 2011, we recognized unrealized losses of \$65.8 million and \$91.9 million, respectively. During the three and nine months ended September 30, 2011, we realized losses of \$8.4 million and \$16.4 million, respectively, related to our derivatives. Our derivative instruments are carried on our condensed consolidated balance sheets at fair value, as assets, if their fair value is positive, or as liabilities, if their fair value is negative.

As of September 30, 2011 and December 31, 2010, we had entered into \$134.0 million and \$214.0 million (notional amount), respectively, of Eurodollar Future strips (“interest rate swap equivalents”) traded in 1,167 and 2,361 individual Futures Contracts transactions, respectively. Our Futures Contracts are traded on the Chicago Mercantile Exchange (“CME”) which requires the use of daily mark-to-market collateral and the CME provides substantial credit support. The collateral requirements of the CME require us to pledge assets under a bi-lateral margin arrangement, including either cash or Agency Securities, and these requirements may vary and change over time based on the market value, notional amount, and remaining term of the Futures Contracts. In the event we are unable to meet a margin call under one of our Futures Contracts, the counterparty to such agreement may have the option to terminate or close-out all of the outstanding Futures Contracts with us. In addition, any close-out amount due to the counterparty upon termination of the counterparty’s transactions would be immediately payable by us pursuant to the applicable agreement.

As of September 30, 2011 and December 31, 2010, we had entered into \$2.8 billion and \$155.0 million (notional amount) of interest rate swap contracts, respectively, traded in 56 and 10 individual transactions, respectively. We have agreements with our swap counterparties that provide for the posting of collateral based on the fair values of our interest rate swap contracts. Through this margining process, either we or our swap counterparty may be required to pledge cash or securities as collateral. Collateral requirements vary by counterparty and change over time based on the market value, notional amount and remaining term of the swap. Certain interest rate swap contracts provide for cross collateralization and cross default with repurchase agreements and other contracts with the same counterparty.

As of September 30, 2011, included in restricted cash on the condensed consolidated balance sheet is \$6.6 million related to margin posted for Futures Contracts as well as \$126.0 million of restricted cash related to interest rate swap contracts. As of December 31, 2010, we had \$4.4 million of restricted cash related to margin posted for Futures Contracts, and \$0.3 million related to interest rate swap contracts.

Note 7 - Repurchase Agreements

At September 30, 2011 and December 31, 2010, we had repurchase agreements in place in the amount of \$5.2 billion and \$1.0 billion, respectively, to finance Agency Security purchases. For the nine months ended September 30, 2011 and the year ended December 31, 2010, the weighted average interest rate or cost of funds was 0.27% and 0.35%, respectively. At September 30, 2011 and December 31, 2010, we had repurchase agreements outstanding with twenty-four and eleven counterparties, respectively, with a weighted average maturity of 30 days and 32 days, respectively.

The following tables represent the contractual repricing information regarding our repurchase agreements as of September 30, 2011 and December 31, 2010:

September 30, 2011	Balance	Weighted Average Contractual Rate	Contractual Interest Payments	Total Contractual Obligation
Within 30 days	\$ 2,595,609,896	0.26%	\$ 489,725	\$ 2,596,099,621

Total	<u>\$ 971,675,658</u>	<u>\$ 42,236,799</u>		<u>100.0%</u>

(1) Equal to the fair value of securities sold, minus the sum of repurchase agreement liabilities plus accrued interest expense

As of September 30, 2011 and December 31, 2010, the weighted average margin requirement, or the percentage amount by which the collateral value must exceed the loan amount, which we also refer to as the haircut, under all our repurchase agreements, was approximately 5.1% and 5.3%, respectively.

Note 8 - Commitments and Contingencies

Management Agreement with ARRM

As discussed in Note 14 "Related Party Transactions," we are party to a management agreement with ARRM. Pursuant to the management agreement, as amended, ARRM is entitled to receive a management fee payable monthly in arrears in an amount equal to 1/12th of an amount, with a minimum based on 1/12th of \$900,000 (inclusive of the original gross merger equity as defined in the management agreement), determined as follows:

- our gross equity raised up to \$50 million, 1% (per annum) of gross equity;
- our gross equity raised up to \$1.0 billion, 1.5% (per annum) of gross equity;
- our gross equity raised exceeds \$1.0 billion, 0.75% (per annum) of gross equity

Operating Leases

We are not party to any agreement for the rental of real property and office space, or any significant leases for office, computer and other equipment or office furnishings.

Indemnifications and Litigation

We enter into certain contracts that contain a variety of indemnifications, to third-parties principally with ARRM and brokers. The maximum potential amount of future payments we could be required to make under these indemnification provisions is unknown. We have not incurred any costs to defend lawsuits or settle claims related to these indemnification agreements. As a result, the estimated fair value of these agreements is minimal. Accordingly, we have no liabilities recorded for these agreements as of September 30, 2011 and December 31, 2010.

ARMOUR Residential REIT, Inc. and Subsidiaries
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2011
(Unaudited)

We are not party to any pending, threatened or contemplated litigation.

Note 9 - Share-Based Compensation

2009 Stock Incentive Plan

We adopted the 2009 Stock Incentive Plan (the "Plan") to attract, retain and reward directors, officers and other employees of ours, and other persons who provide services to us in the course of operations (collectively "Eligible Individuals").

The Plan provides for grants of common stock, restricted shares of common stock ("RSUs"), stock options, performance shares, performance units, stock appreciation rights and other equity and cash-based awards (collectively "awards.") On May 12, 2010, our Board allocated up to 250,000 shares to be available under the Plan. In considering such allocation, the Board considered the size of the Plan relative to our capital base and our current and potential future performance and capitalization. On July 18, 2011, our stockholders approved an amendment to the Plan to increase the number of shares issuable thereunder from 250,000 shares to 2,000,000 shares and the Plan was amended accordingly.

The Plan allows for the Board to expand the types of awards available under the Plan and determine the maximum number of shares that may underlie these awards in any one year to any Eligible Individual. If an award granted under the Plan expires or terminates, the shares subject to any portion of the award that expires or terminates without having been exercised or paid, as the case may be, will again become available for the issuance of additional awards.

Awards Under the Plan

During the nine months ended September 30, 2011, we allocated 2,000,000 RSUs subject to various performance conditions and awarded a total of 192,500 RSUs to members of our Board (the "Board Awards") and employees of ARRM (the "ARRM Awards"). We account for the ARRM Awards under ASC Topic No. 505-50 "Equity Based Payments to Non-Employees." We account for the Board Awards under ASC Topic No. 718 "Compensation- Stock Compensation." The Board Awards and the ARRM Awards were awarded at a weighted average grant date fair value per RSU of \$7.91, determined at the grant date based on the closing price of our common stock. Both awards are service-based awards, and vest quarterly in equal amounts over a five year term ending December 31, 2015. We recorded \$0.07 million and \$0.21 million of non-cash compensation expense in the three and nine months ended September 30, 2011, respectively. These amounts are included in other expenses in our condensed consolidated statement of operations. Of these amounts, \$0.06 million at September 30, 2011, were included in accounts payable and accrued expenses representing shares issuable per the agreements and the remaining \$0.10 million is included in additional paid in capital; this remaining amount is a net amount which includes \$0.05 million of stock compensation withheld to pay income taxes.

As of September 30, 2011, there was approximately \$0.2 million of unearned non-cash stock-based compensation related to the Board Awards and \$1.0 million related to ARRM awards (based on September 30, 2011 stock price), that we expect to recognize as an expense over the remaining service period of 4.5 years. The Board Awards are expensed on a straight-line basis over the requisite service period of 5 years; the ARRM Awards are valued and expensed as they vest at each quarter commencing March 31, 2011 and ending December 31, 2015, based on the closing price of our common stock on the last trading day of the quarter. At September 30, 2011, 28,890 of our outstanding RSUs were vested.

RSU transactions for the period ended September 30, 2011, are summarized below:

	Number of Awards	Weighted Average Grant Date Fair Value per Award
Unvested Awards Outstanding, December 31, 2010	-	\$ -
Granted	192,500	7.91
Vested	(28,890)	7.91
Unvested Awards Outstanding September 30, 2011	<u>163,610</u>	<u>\$ 7.91</u>

Note 10 - Shareholders' Equity

On January 26, 2011, we completed an underwritten secondary public offering of 6,000,000 shares of common stock at a price of \$7.55 per share. The underwriters fully exercised the over-allotment option for 900,000 additional shares. Net proceeds were \$49.0 million, net of issuance costs of approximately \$3.1 million.

On January 28, 2011, a cash dividend of \$0.12 per common share, or \$2.0 million in the aggregate, was paid to holders of record on January 15, 2011. This amount included \$0.02 per common share of taxable income related to the year ended December 31, 2010.

On February 8, 2011, we completed an underwritten secondary public offering of 7,750,000 shares of common stock at a price of \$7.60 per share. The underwriters fully exercised the over-allotment option for 1,162,500 additional shares. Net proceeds were \$64.0 million, net of issuance costs of approximately \$3.7 million.

On February 25, 2011, a cash dividend of \$0.12 per common share, or \$3.9 million in the aggregate, was paid to holders of record on February 15, 2011.

On February 28, 2011, we entered into an equity distribution agreement with JMP Securities LLC and Ladenburg Thalmann & Co. Inc. to offer and sell from time to time up to 6,500,000 shares of our common stock in at-the-market transactions. As of September 30, 2011, we had issued and sold 5,212,430 shares of our common stock under this agreement for net proceeds of \$37.5 million.

On March 30, 2011, a cash dividend of \$0.12 per common share, or \$3.9 million in the aggregate, was paid to holders of record on March 15, 2011.

On April 7, 2011, we implemented a Dividend Reinvestment and Stock Purchase Plan through which investors may purchase additional shares of our common stock by reinvesting some or all of the cash dividends received on shares of our common stock. Shareholders may also make optional cash purchases of shares of our common stock subject to certain limitations detailed in the plan prospectus. As of September 30, 2011 we had issued and sold 11,879,844 shares under the plan for net proceeds of \$86.8 million.

On April 13, 2011, we completed an underwritten secondary public offering of 16,000,000 shares of common stock at a price of \$7.40 per share. The underwriters partially exercised the over-allotment option for 1,000,000 additional shares. Net proceeds were \$121.1 million, net of issuance costs of approximately \$4.7 million.

On April 28, 2011, a cash dividend of \$0.12 per common share, or \$5.9 million in the aggregate, was paid to holders of record on April 15, 2011.

On May 27, 2011, a cash dividend of \$0.12 per common share, or \$5.9 million in the aggregate, was paid to holders of record on May 15, 2011.

On June 6, 2011, we completed an underwritten secondary public offering of 16,000,000 shares of common stock at a price of \$7.40 per share. The underwriters fully exercised the over-allotment option for 2,400,000 additional shares. Net proceeds were \$131.0 million, net of issuance costs of approximately \$5.2 million.

On June 29, 2011, a cash dividend of \$0.12 per common share, or \$8.3 million in the aggregate, was paid to holders of record on June 15, 2011.

On July 28, 2011, a cash dividend of \$0.12 per common share, or \$9.1 million in the aggregate, was paid to holders of record on July 15, 2011.

On August 30, 2011, a cash dividend of \$0.12 per common share, or \$9.1 million in the aggregate, was paid to holders of record on August 15, 2011.

On September 29, 2011, a cash dividend of \$0.12 per common share, or \$10.1 million in the aggregate, was paid to holders of record on September 15, 2011.

Note 11 - Fair Value of Financial Instruments

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The three levels of valuation hierarchy are defined as follows:

Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 - inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The following describes the valuation methodologies used for our assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Cash and restricted cash – Cash includes cash on deposit with financial institutions and investments in high quality overnight money market funds, all of which have maturities of three months or less, at the time of purchase. The carrying amount of cash is deemed to be its fair value. Restricted cash includes cash held by counterparties as collateral.

Agency Securities Available for Sale - Fair value for the Agency Securities in our portfolio is based on obtaining a valuation for each Agency Security from third-party pricing services and dealer quotes. Management reviews pricing used to ensure that current market conditions are properly represented. Values obtained from the independent pricing service for similar instruments are classified as Level 2 securities if the pricing methods used are consistent with the Level 2 definition. If quoted prices for a security are not reasonably available from the pricing service, but dealer quotes are, the security will be re-classified as a Level 3 security. If neither is available, management will determine the fair value based on characteristics of the security that we receive from the issuer and based on available market information received from dealers and classify it as a Level 3 security. At September 30, 2011 and December 31, 2010, all of our Agency Security values were based solely on third-party sources.

Derivative Transactions - The fair value of our Futures Contracts are based on closing prices on the CME. The fair value of our interest rate swap contracts are valued using a third-party. Our Futures Contracts are classified as Level 1 and the value of our interest rate swap contracts are Level 2.

Repurchase Agreements - The fair value of repurchase agreements reflects the present value of the contractual cash flows discounted at the estimated LIBOR based market interest rates at the valuation date for repurchase agreements with a term equivalent to the remaining term to interest rate repricing, which may be at maturity, of our repurchase agreements. The carrying amount of repurchase agreements is deemed to be their fair value.

The following table presents our financial instruments measured at fair value as of September 30, 2011.

	Level 1	Level 2	Level 3	Total
Assets (liabilities) carried at fair value:				
Agency Securities, available for sale	\$ -	\$ 5,856,003,961	\$ 119,819,457	\$ 5,975,823,418
Derivatives	(5,781,588)	(88,639,999)	-	(94,421,587)
Total	<u>\$ (5,781,588)</u>	<u>\$ 5,767,363,962</u>	<u>\$ 119,819,457</u>	<u>\$ 5,881,401,831</u>

The following table presents our financial instruments measured at fair value as of December 31, 2010.

	Level 1	Level 2	Level 3	Total
Assets (liabilities) carried at fair value:				
Agency Securities, available for sale	\$ -	\$ 1,114,175,921	\$ 47,674,759	\$ 1,161,850,680
Derivatives	(2,632,712)	-	102,067	(2,530,645)
Total	<u>\$ (2,632,712)</u>	<u>\$ 1,114,175,921</u>	<u>\$ 47,776,826</u>	<u>\$ 1,159,320,035</u>

ARMOUR Residential REIT, Inc. and Subsidiaries
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2011
(Unaudited)

When a new pool of mortgages is created, the third-party pricing services do not always become aware of the new pool for the early period of its existence. To the extent that we purchase a pool which the pricing service does not have listed, we seek independent third-party pricing from other services or brokers. Additionally, we will ask the third-party pricing service to include those assets in its list of priced assets in the future. As of December 31, 2010, we owned certain assets which were not priced by the independent third-party pricing service and those assets were therefore classified as Level 3 assets. On September 30, 2011, these assets were priced by the pricing service and were therefore, reclassified as Level 2 assets. As of September 30, 2011, all Agency Securities except four securities were priced by a pricing service.

The following table presents detail of our Level 3 financial instruments measured at fair value as of September 30, 2011.

	Level 3
Balance as of December 31, 2010	\$ 47,776,826
Reclassification of agency securities	(47,674,759)
Reclassification of interest rate swap contracts	(102,067)
Purchases of agency securities, at cost	119,666,138
Unrealized gain on agency securities included in other comprehensive income	153,319
Balance as of September 30, 2011	\$ 119,819,457

The following table presents detail of our Level 3 financial instruments measured at fair value as of December 31, 2010.

	Level 3
Balance as of January 1, 2010	\$ -
Purchases of agency securities, at cost	47,681,986
Unrealized loss on agency securities included in other comprehensive income	(7,227)
Unrealized gain on interest rate swap contracts included in unrealized gain (loss) on derivatives on the condensed consolidated statements of operations	102,067
Balance as of December 31, 2010	\$ 47,776,826

Note 12 – Income Taxes

We intend to qualify and have elected to be taxed as a REIT under the Code. We will generally not be subject to federal income tax to the extent that we distribute our taxable income to our shareholders, and as long as we satisfy the ongoing REIT requirements including meeting certain asset, income and stock ownership tests.

We have elected to treat Enterprise as a taxable REIT subsidiary, which is a tax paying entity for income tax purposes and it is taxed separately from ARMOUR. As of December 31, 2010, we had recognized refundable income taxes of \$0.5 million, related to the carry back of net operating losses incurred by Enterprise in 2009 to prior years in which Enterprise reported taxable income. This amount was received in January 2011.

Our provision for income taxes for the three and nine months ended September 30, 2011, included \$2,050 and \$14,263, respectively, of federal income tax expense resulting from undistributed REIT taxable income for the year ended December 31, 2010. Our provision for income taxes for the three and nine months ended September 30, 2010, included \$82 and \$2,482, respectively, of federal income tax expense resulting from undistributed REIT taxable income for the year ended December 31, 2009.

Note 13 - Interest Rate Risk

Our primary market risk is interest rate risk. Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. Changes in the general level of interest rates can affect net interest income, which is the difference between the interest income earned and the interest expense incurred in connection with the liabilities, by affecting the spread between the interest-earning assets and interest-bearing liabilities. Changes in the level of interest rates also can affect the value of Agency Securities and our ability to realize gains from the sale of these assets. A decline in the value of the Agency Securities pledged as collateral for borrowings under repurchase agreements could result in the counterparties demanding additional collateral pledges or liquidation of some of the existing collateral to reduce borrowing levels.

We seek to manage the extent to which net income changes as a function of changes in interest rates by matching adjustable rate assets with variable rate borrowings. We seek to economically hedge the potential impact on net income of periodic and lifetime coupon adjustment restrictions in the portfolio of Agency Securities by entering into interest rate agreements such as interest rate swaps. As of September 30, 2011 and December 31, 2010, we had entered into interest rate swap contracts to pay a fixed rate and receive a floating rate of interest, with a total notional amount of \$2.8 billion and \$155.0 million, respectively. Changes in interest rates may also have an effect on the rate of mortgage principal prepayments and, as a result, prepayments on Agency Securities. Prepayments, which result in the expensing of unamortized premium, will reduce net income compared to what net income would be absent such prepayments.

Note 14 - Related Party Transactions

Management Fees

We are externally-managed by ARRM pursuant to our Management Agreement (see Note 8). All of our executive officers are also employees of ARRM. ARRM manages our day-to-day operations, subject to the direction and oversight of the Board. The Management Agreement expires on November 6, 2014 and is thereafter automatically renewed for an additional one-year term unless terminated under certain circumstances. ARRM must provide 180 days prior notice of any such termination.

Under the terms of the Management Agreement, ARRM is responsible for costs incident to the performance of its duties, such as compensation of its employees and various overhead expenses. ARRM is responsible for the following primary roles:

- Advising us with respect to, arrange for, and manage the acquisition, financing, management and disposition of, elements of our investment portfolio,
- Evaluating the duration risk and prepayment risk within the investment portfolio and arranging borrowing and hedging strategies,
- Coordinating capital raising activities,
- Advising us on the formulation and implementation of operating strategies and policies, arranging for the acquisition of assets, monitoring the performance of those assets, arranging for various types of financing and hedging strategies, and providing administrative and managerial services in connection with our day-to-day operations, and
- Providing executive personnel along with administrative personnel, office space, and other appropriate services required in rendering management services to us.

For the three and nine months ended September 30, 2011, we incurred \$2.2 million and \$4.4 million in management fees to ARRM, respectively. For the three and nine months ended September 30, 2010, we incurred \$0.2 million and \$0.4 million in management fees to ARRM, respectively.

Note 15 – Subsequent Events

On October 11, 2011, we entered into an equity distribution agreement with Deutsche Bank Securities Inc., JMP Securities LLC and Ladenburg Thalmann & Co. Inc. to offer and sell, from time to time, up to 40,000,000 shares of our common stock in at-the-market transactions. As of September 30, 2011, we have not sold any shares under this agreement.

On October 28, 2011, a cash dividend of \$0.11 per common share, or \$9.3 million in the aggregate, was paid to holders of record on October 15, 2011.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our financial condition and results of operations should be read in conjunction with our financial statements and related notes included elsewhere in this report.

References to “we”, “us”, “our”, “ARMOUR” or the “Company” are to ARMOUR Residential REIT, Inc. References to “ARRM” are to ARMOUR Residential Management LLC, a Delaware limited liability company. References to “Enterprise” are to Enterprise Acquisition Corp., which is a wholly-owned subsidiary of ARMOUR.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains various “forward-looking statements.” Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by the use of forward-looking terminology such as “believes,” “expects,” “may,” “will,” “would,” “could,” “should,” “seeks,” “approximately,” “intends,” “plans,” “projects,” “estimates” or “anticipates” or the negative of these words and phrases or similar words or phrases. All forward-looking statements may be impacted by a number of risks and uncertainties, including statements regarding the following subjects:

- our business and investment strategy;
- our anticipated results of operations;
- statements about future dividends;
- our ability to obtain financing arrangements;
- our understanding of our competition and ability to compete effectively;
- market, industry and economic trends; and
- interest rates.

The forward-looking statements in this report are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to us. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. You should carefully consider these risks before you make an investment decision with respect to our common stock.

We cannot guarantee future results, levels of activity, performance or achievements. You should not place undue reliance on forward-looking statements, which apply only as of the date of this report. We do not intend and disclaim any duty or obligation to update or revise any industry information or forward-looking statements set forth in this report to reflect new information, future events or otherwise, except as required under the U.S. Federal securities laws.

Overview

We are an externally-managed Maryland corporation organized in 2008, managed by ARRM. We invest primarily in hybrid adjustable rate, adjustable rate and fixed rate residential mortgage backed securities issued or guaranteed by a U.S. Government-chartered entity, such as the Federal National Mortgage Association (more commonly known as Fannie Mae) and the Federal Home Loan Mortgage Corporation (more commonly known as Freddie Mac), or guaranteed by the Government National Mortgage Administration, a U.S. Government corporation (more commonly known as Ginnie Mae), which we refer to collectively as Agency Securities. From time to time, a portion of our portfolio may be invested in unsecured notes and bonds issued by U.S. Government-chartered entities, which we refer to as Agency Debt, U.S. Treasuries and money market instruments, subject to certain income tests we must satisfy for our qualification as a real estate investment trust, or REIT.

We seek attractive long-term investment returns by investing our equity capital and borrowed funds in our targeted asset class. We earn returns on the spread between the yield on our assets and our costs, including the interest cost of the funds we borrow, after giving effect to our hedges. We intend to qualify and have elected to be taxed as a REIT under the Internal Revenue Code (“the Code”). We will generally not be subject to federal income tax to the extent that we distribute our taxable income to our shareholders, and as long as we satisfy the ongoing REIT requirements including meeting certain asset, income and stock ownership tests. Our business plan is to identify and acquire Agency Securities, finance our acquisitions with borrowings under a series of short-term repurchase agreements at the most competitive interest rates available to us and then cost-effectively hedge our interest rate and other risks based on our entire portfolio of assets, liabilities and derivatives and our management's view of the market. Successful implementation of our business plan requires us to address interest rate risk, maintain adequate liquidity and effectively hedge interest rate risks. We execute our business

plan in a manner consistent with our intention of qualifying as a REIT and avoiding regulation as an investment company.

On August 31, 2011, the Securities and Exchange Commission (“SEC”) voted to request comment on the Investment Company Act of 1940, (“the Act”) treatment of mortgage-related pools, which includes mortgage REITs. Currently, mortgage REITs avoid classification as investment companies by claiming an exemption provided by Section 3(c)(5)(C) of the Act and relying on private letter rulings, which allows them to use financial leverage far in excess of the leverage limitations of 0.5x to 1.0x that apply to mutual funds and closed-end funds. While we believe the primary goal of the SEC is to clarify the 3(c)(5)(C) exemption, which was created to exclude companies engaged in the mortgage banking business and has not been reviewed for over 50 years, we do not believe the SEC is concerned with “safety and soundness” issues related to mortgage REITs generally, and believe the most likely outcome will be that mortgage REITs will continue to be allowed to be classified as investment companies and not face specific leverage limitations. However, if mortgage REITs are no longer allowed to claim exemption from the Act, or if leverage is explicitly limited, mortgage REIT business economics could be materially adversely impacted.

Our Manager

We are externally-managed by ARRM pursuant to our Management Agreement (see Note 8 to the condensed consolidated financial statements). All of our executive officers are also employees of ARRM. ARRM manages our day-to-day operations, subject to the direction and oversight of the Board of Directors (“Board”). The Management Agreement expires on November 6, 2014 and is thereafter automatically renewed for an additional one-year term unless terminated under certain circumstances. ARRM must provide 180 days prior notice of any such termination.

ARRM is entitled to receive a management fee payable monthly in arrears in an amount equal to 1/12th of an amount, with a minimum based on 1/12th of \$900,000, (inclusive of the original gross merger equity as defined in the management agreement), determined as follows:

- our gross equity raised up to \$50 million, 1% (per annum) of gross equity;
- our gross equity raised up to \$1.0 billion, 1.5% (per annum) of gross equity;
- our gross equity raised in excess of \$1.0 billion, 0.75% (per annum) of gross equity

Factors that Affect our Results of Operations and Financial Condition

Our results of operations and financial condition are affected by various factors, many of which are beyond our control, including, among other things, our net interest income, the market value of our assets and the supply of and demand for such assets. We invest in financial assets and markets, and recent events, such as those discussed below, can affect our business in ways that are difficult to predict, and may produce results outside of typical operating variances. Our net interest income varies primarily as a result of changes in interest rates, borrowing costs and prepayment speeds, the behavior of which involves various risks and uncertainties. Prepayment rates, as reflected by the rate of principal pay downs, and interest rates vary according to the type of investment, conditions in financial markets, government actions, competition and other factors, none of which can be predicted with any certainty. In general, as prepayment rates on our Agency Securities purchased at a premium increase, related purchase premium amortization increases, thereby reducing the net yield on such assets. Because changes in interest rates may significantly affect our activities, our operating results depend, in large part, upon our ability to manage interest rate risks and prepayment risks effectively while maintaining our status as a REIT. In addition, since we have elected not to use cash flow hedge accounting, earnings reported in accordance with accounting principles generally accepted in the U.S. (“GAAP”) will fluctuate even in situations where our hedges are operating as intended. As a result of this mark-to-market accounting treatment, our results of operations are likely to fluctuate far more than if we were to designate our hedging activities as cash flow hedges. Comparisons with companies that use cash flow hedge accounting for all or part of their hedging activities may not be meaningful.

We anticipate that, for any period during which changes in the interest rates earned on our assets do not coincide with interest rate changes on our borrowings, such assets will reprice more slowly than the corresponding liabilities. Consequently, changes in interest rates, particularly short-term interest rates, may significantly influence our net interest income. With the maturities of our assets generally of longer term than those of our liabilities, interest rate increases will tend to decrease our net interest income and the market value of our assets (and therefore our book value). Such rate increases could possibly result in operating losses or adversely affect our ability to make distributions to our shareholders.

Prepayments on Agency Securities and the underlying mortgage loans may be influenced by changes in market interest rates and a variety of economic and geographic factors beyond our control, as well as policy decisions by Fannie Mae, Freddie Mac and Ginnie Mae. Consequently prepayment rates cannot be predicted with certainty. To the extent we have acquired Agency Securities at a premium or discount to par, or face value, changes in prepayment rates may impact our anticipated yield. In periods of declining interest rates, prepayments on our Agency Securities will likely increase. If we are unable to reinvest the proceeds of such

prepayments at comparable yields, our net interest income may suffer. The recent climate of government intervention in the mortgage markets significantly increases the risk associated with prepayments.

While we intend to use strategies to economically hedge some of our interest rate risk, we do not intend to hedge all of our exposure to changes in interest rates and prepayment rates, as there are practical limitations on our ability to insulate our portfolio from all potential negative consequences associated with changes in short-term interest rates in a manner that will allow us to seek attractive net spreads on our portfolio.

In addition, a variety of other factors relating to our business may also impact our financial condition and operating performance. These factors include:

- our degree of leverage;
- our access to funding and borrowing capacity;
- our use of derivatives to hedge interest rate risk; and
- the REIT requirements, the requirements to qualify for an exemption under the Act and other regulatory and accounting policies related to our business.

ARRM, our manager, is entitled to receive a monthly management fee that is based on our equity (as defined in our Management Agreement), regardless of the performance of our portfolio. Accordingly, the payment of our monthly management fee may not decline in the event of a decline in our profitability and may cause us to incur losses.

For a discussion of additional risks relating to our business see “Risk Factors” in Item 1A, Risk Factors, below, and in our Annual Report on Form 10-K for the year ended December 31, 2010.

Market and Interest Rate Trends and the Effect on our Portfolio

Credit Market Disruption and Current Conditions

During the past few years, the residential housing and mortgage markets in the United States have experienced a variety of difficulties and changed economic conditions including loan defaults, credit losses and decreased liquidity. These conditions have resulted in volatility in the value of the Agency Securities we purchase and an increase in the average collateral requirements under our repurchase agreements. While these markets recovered a great deal in 2010, further increased volatility and deterioration in the broader residential mortgage and Residential Mortgage Backed Securities (“RMBS”) markets may adversely affect the performance and market value of the Agency Securities and other high quality RMBS.

The uncertainty in the U.S. interest rate markets in 2011 has produced volatility and opportunities in our markets. Early in 2011, optimism about an economic acceleration caused many economists to increase their U.S. GDP forecast, with some predicting a U.S. Federal Reserve tightening of monetary policy in early 2012. However, due to (i) U.S. Department of Labor payroll data, (ii) states continued paring of payrolls and the potential of the federal government implementing further deficit reduction measures, and (iii) the cautious pace of private sector job growth, most economists are now expecting continued lackluster economic growth in the U.S. As a result, many economists have pushed out their forecasts for a tightening of monetary policy in the U.S. to late 2012 or 2013 at the earliest. This environment has created strong demand for Agency Securities and has also reduced the costs of our financing and hedging.

On August 5, 2011, Standard & Poor’s Corporation downgraded the U.S.’s credit rating from AAA to AA+, and on August 8, 2011, Fannie Mae and Freddie Mac’s credit ratings were downgraded from AAA to AA+. Because Fannie Mae and Freddie Mac are in conservatorship of the U.S. Government, the U.S.’s credit rating downgrade and Fannie Mae and Freddie Mac’s credit rating downgrades will impact the credit risk associated with Agency Securities and, therefore, may decrease the value of the Agency Securities in our portfolio.

Developments at Fannie Mae and Freddie Mac

Payments on the Agency Securities in which we invest are guaranteed by Fannie Mae and Freddie Mac. Because of the guarantee and the underwriting standards associated with mortgages underlying Agency Securities, Agency Securities historically have had high stability in value and been considered to present low credit risk. In 2008, Fannie Mae and Freddie Mac were placed under the conservatorship of the U.S. Government due to the significant weakness of their financial condition. The turmoil in the residential mortgage sector and concern over the future role of Fannie Mae and Freddie Mac have generally increased credit spreads and decreased price stability of Agency Securities. It is unclear how and when Fannie Mae and Freddie Mac may be restructured by the U.S. Government and the impact that may have on our existing portfolio and continuing investment strategy.

In response to the credit market disruption and the deteriorating financial condition of Fannie Mae and Freddie Mac, Congress and the U.S. Treasury undertook a series of actions in 2008 aimed at stabilizing the financial markets in general, and the mortgage market in particular. These actions include the large-scale buying of mortgage backed securities, significant equity infusions into banks and aggressive monetary policy.

In addition, the U.S. Federal Reserve initiated a program in 2008 to purchase \$200.0 billion in direct obligations of Fannie Mae, Freddie Mac and the Federal Home Loan Banks and \$1.3 trillion in Agency Securities issued and guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae. The U.S. Federal Reserve stated that its actions were intended to reduce the cost and increase the availability of credit for the purchase of houses, which in turn was expected to support housing markets and foster improved conditions in financial markets more generally. This purchase program was completed on March 31, 2010. We are unable to predict the timing or manner in which the U.S. Treasury or the Federal Reserve will liquidate their holdings or make further interventions in the Agency Securities markets, or what impact, if any, such action could have on the Agency Securities market, the Agency Securities we hold, our business, results of operations and financial condition.

In February 2010, Fannie Mae and Freddie Mac announced that they would execute wholesale repurchases of loans which they considered seriously delinquent from existing mortgage pools. This action temporarily decreased the value of these securities until complete details of the programs and the timing were announced and reduced our yield in the months of repayment. Freddie Mac implemented its purchase program in February 2010 with actual purchases beginning in March 2010. Fannie Mae began their process in March 2010 and announced it would implement the initial purchases over a period of three months, beginning in April 2010. Further, both agencies announced that on an ongoing basis they would purchase loans from the pools of mortgage loans underlying their mortgage pass-through certificates that became 120 days delinquent.

In February 2011, the U.S. Treasury along with the U.S. Department of Housing and Urban Development released a report entitled, "Reforming America's Housing Finance Market" to Congress outlining recommendations for reforming the U.S. housing system, specifically Fannie Mae and Freddie Mac and transforming the U.S. Government's involvement in the housing market. It is unclear how future legislation may impact the housing finance market and the investing environment for Agency Securities as the method of reform is undecided and has not yet been defined by the regulators. Without U.S. Government support for residential mortgages, we may not be able to execute our current business model in an efficient manner.

We cannot predict whether or when new actions may occur, the timing and pace of current actions already implemented, or what impact if any, such actions, or future actions, could have on our business, results of operations and financial condition.

U.S. Government Market Intervention

One of the main factors impacting market prices was the U.S. Federal Reserve's program to purchase agency securities which had commenced in January 2009 and was terminated on March 31, 2010. In total, \$1.3 trillion of agency securities were purchased. In addition, through the course of 2009, the U.S. Treasury purchased \$250.0 billion of agency securities. An effect of these purchases has been an increase in the prices of agency securities, which has decreased our net interest margin. When these programs terminated, the market expectation was that it might cause a decrease in demand for these securities which would likely reduce their market price. However, this has not happened and we continue to see strong demand as these securities remain desirable assets in this rather volatile economic environment. It is difficult to quantify the impact, as there are many factors at work at the same time that affect the price of Agency Securities and, therefore, our yield and book value. Due to the unpredictability in the markets for our securities in particular and yield generating assets in general, there is no pattern that can be implied with any certainty. In March 2011, the U.S. Treasury announced that it will begin the orderly wind down of its remaining agency securities with sales up to \$10.0 billion per month, subject to market conditions. It is unclear how these sales will affect market conditions and pricing. On September 21, 2011, the U.S. Federal Reserve announced that it will begin reinvesting principal payments from its holdings of Agency Debt and Agency MBS into Agency MBS.

Financial Regulatory Reform Bill and Other Government Activity

Certain programs initiated by the U.S. Government, through the Federal Housing Administration ("FHA") and the Federal Deposit Insurance Corporation, to provide homeowners with assistance in avoiding residential mortgage loan foreclosures are currently in effect. The programs may involve, among other things, the modification of mortgage loans to reduce the principal amount of the loans or the rate of interest payable on the loans, or to extend the payment terms of the loans. While the effect of these programs has not been as extensive as originally expected, the effect of such programs for holders of agency securities could be that such holders would experience changes in the anticipated yields of their agency securities due to (i) increased prepayment rates and (ii) lower interest and principal payments.

On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act. This legislation aims to restore responsibility and accountability to the financial system. It is unclear how this legislation may impact the borrowing environment, investing environment for agency securities and interest rate swaps as much of the legislation implementation has not yet been defined by the regulators.

During the third quarter of 2011, concern intensified about the financial conditions and creditworthiness of several European nations, particularly Greece. European nations have been working through a variety of entities and strategies to resolve these concerns though success is uncertain. Continuation and worsening of these concerns may severely impact financial market conditions including the valuation of our investments, the terms of, and potentially, our ability to borrow in order to finance our investment operations.

Interest Rates

The overall credit market deterioration since August 2007 has also affected prevailing interest rates. For example, interest rates have been unusually volatile since the third quarter of 2007. Since September 18, 2007, the U.S. Federal Reserve has lowered the target for the Federal Funds Rate nine times from 4.75% to 1.00% in October 2008. In December 2008, the Federal Reserve stated that it was adopting a policy of “quantitative easing” and would target keeping the Federal Funds Rate between 0.00% and 0.25%. To date, the Federal Reserve has maintained that target range. Our funding costs, which traditionally have tracked the 30-day London Interbank Offered Rate (“LIBOR”) have generally benefited by this easing of monetary policy, although to a somewhat lesser extent. Because of continued uncertainty in the credit markets and U.S. economic conditions, we expect that interest rates are likely to experience continued volatility, which will likely affect our financial results since our cost of funds is largely dependent on short-term rates.

Historically, 30-day LIBOR has closely tracked movements in the Federal Funds Rate and the Effective Federal Funds Rate. The Effective Federal Funds Rate can differ from the Federal Funds Rate in that the Effective index represents the volume weighted average of interest rates at which depository institutions lend balances at the Federal Reserve to other depository institutions overnight (actual transactions, rather than target rate).

Our borrowings in the repurchase market have also historically closely tracked LIBOR. So traditionally, a lower Federal Funds Rate has indicated a time of increased net interest margin and higher asset values. However, since July 2007 (prior to our commencement of operations) LIBOR and repurchase market rates have varied greatly, and often have been significantly higher than the target and the Effective Federal Funds Rate. The difference between 30-day LIBOR and the Effective Federal Funds rate has also been quite volatile, with the spread alternately returning to more normal levels and then widening out again. The volatility in these rates and divergence from the historical relationship among these rates could negatively impact our ability to manage our portfolio. If this were to occur, our net interest margin and the value of our portfolio might suffer as a result. The following table shows 30-day LIBOR as compared to the Effective Federal Funds rate at each period end:

Quarter ended	30-Day LIBOR	Effective Federal Funds Rate
September 30, 2011	0.24%	0.06%
June 30, 2011	0.19	0.07
March 31, 2011	0.24	0.10
December 31, 2010	0.26	0.13
September 30, 2010	0.26	0.15
June 30, 2010	0.35	0.09
March 31, 2010	0.25	0.09
December 31, 2009	0.23	0.05

Principal Repayment Rate

Our net income is primarily a function of the difference between the yield on our assets and the financing cost of owning those assets. Since we tend to purchase assets at a premium to par, the main item that can affect the yield on our assets after they are purchased is the rate at which the mortgage borrowers repay the loan. While the scheduled repayments, which are the principal portion of the homeowners’ regular monthly payments, are fairly predictable, the unscheduled repayments, which are generally refinancing of the mortgage but can also result from repurchases of delinquent, defaulted, or modified loans, are less so. Being able to accurately estimate and manage these repayment rates is a critical portion of the management of our portfolio, not only for estimating current yield but also for considering the rate of reinvestment of those proceeds into new securities, the yields which those new securities may add to our portfolio and our hedging strategy. We expect that prepayment rates will be elevated due to repurchases of loans that reach 120 day or more delinquency by Freddie Mac and Fannie Mae on a continuing basis.

The following table shows the average principal repayment rate for those securities which have settled for each quarter since our commencement of operations (as our operations commenced in November 2009, there is only one month of prepayment data for 2009 for our portfolio of settled Agency Securities):

Quarter ended	Average Quarterly Principal Repayment Rate
September 30, 2011	12.4%
June 30, 2011	9.3
March 31, 2011	11.7
December 31, 2010	10.8
September 30, 2010	11.1
June 30, 2010	15.4
March 31, 2010	14.5
December 31, 2009	8.6

We typically purchase Agency Securities at premium prices. The premium price paid over par value on those assets is expensed as the underlying mortgages experience repayment or prepayment. The lower the constant prepayment rate, the lower the amount of amortization expense for a particular period. Accordingly, the yield on an asset, and earnings, are higher. If prepayment rates increase, the amount of amortization expense for a particular period will go up. These increased prepayment rates would act to decrease the yield on an asset and would decrease earnings.

Book Value per Share

As of September 30, 2011, our book value per share of common stock (total shareholders' equity divided by shares of common stock outstanding) was \$6.78, an increase of \$0.17 from \$6.61 at December 31, 2010. This increase was primarily attributable to shareholder accretion from the equity capital raised during the period, issuing 56,424,930 shares of common stock. In addition, 11,879,844 shares were issued in the Dividend Reinvestment and Stock Purchase Plan.

Although we attempt to structure our derivatives to offset the changes in asset prices, they are not perfectly correlated, and depend on the corresponding durations and sections of the yield curve that moves to offset each other. Our derivatives, which consist of interest rate swap contracts and Futures Contracts act to fix the borrowing cost on a portion of our financing and generally help to hedge some of the change in our book value. Generally, the value of our derivatives move in the opposite direction of the value of our Agency Securities. In an environment of very low interest rates, further interest rate reductions may cause the value of our derivative positions to decline more than the absolute and pro rata increase in the value of our Agency Securities. For the nine month period ending September 30, 2011, the unrealized change of our derivative positions decreased by \$91.9 million and the unrealized change of our Agency Securities increased by \$67.5 million. For the year ended December 31, 2010, the unrealized change of our derivative positions declined by \$2.5 million and the unrealized change of our Agency Securities decreased by \$4.3 million.

Investments

Agency Securities

As of September 30, 2011, our Agency Security portfolio, both trades that have settled and forward settle trades that we have committed to settle, consisted of approximately \$6.0 billion in market value of Agency Securities with initial fixed-interest rate periods of three years, five years, seven years, ten years and fifteen years.

The following table represents key data regarding our results of operations since the beginning of operations on November 6, 2009:

As of	Agency Securities	Repurchase Agreements	Payable for Unsettled Security Purchases	Equity	Shares Outstanding	Book Value Per Share	Quarterly Dividends Declared	Quarterly Diluted Earnings (Loss) Per Share
September 30, 2011	\$ 5,975,823,418	\$ 5,221,525,340	\$ 475,109,262	\$ 574,667,885	84,758,505	\$ 6.78	\$ 0.36	\$ (0.44)
June 30, 2011	5,258,400,274	4,655,226,247	302,680,242	534,030,257	74,781,174	7.14	0.36	(0.14)
March 31, 2011	2,273,914,732	2,099,366,245	19,941,430	220,612,375	32,254,054	6.84	0.34	0.33

March 31, 2010	164,583,811	168,525,093	-	21,417,725	2,304,054	9.30	0.40	0.13
December 31, 2009	118,648,724	46,388,602	58,559,479	21,491,096	2,304,054	9.33	-	(0.08)

As of September 30, 2011, our Agency Securities portfolio was purchased at a net premium to par value with a weighted average amortized cost, including settled and forward settle securities of 104.17%, due to the average interest rates on these securities being higher than prevailing market rates. As of September 30, 2011, we had approximately \$236.7 million of unamortized premium included in the cost basis of our investments, inclusive of both settled and forward settle securities. As of September 30, 2011, our investment portfolio of securities consisted of Agency Securities as follows:

- (1) The current face is the current monthly remaining dollar amount of principal of an Agency Security. We compute current face by multiplying the original face value of the security by the current principal balance factor. The current principal balance factor is a fraction, where the numerator is the current outstanding balance and the denominator is the original principal balance.
- (2) For a pass-through certificate, the coupon reflects the weighted average nominal rate of interest paid on the underlying mortgage loans, net of fees paid to the servicer and the agency. The coupon for a pass-through certificate may change as the underlying mortgage loans are prepaid.
- (3) Amortized purchase price is the dollar amount, per \$100 of current face, of our purchase price for the security, adjusted for amortization as a result of scheduled and unscheduled principal repayments.
- (4) Amortized cost is our total purchase price for the Agency Security, adjusted for amortization as a result of scheduled and unscheduled principal repayments.
- (5) Market price is the dollar amount of market value, per \$100 of nominal, or face value, of the Agency Security. We value our Agency Securities using a third-party pricing service whose pricing model incorporates common market pricing methods. Management reviews the pricing to ensure that current market conditions are properly represented.
- (6) Market value is the total market value for the security.

As of September 30, 2011, we had committed to purchase securities for settlements in October and November of 2011. The information below was current as of September 30, 2011, but subject to change due to amortization prior to settlement. In addition, some forward trades of new issue securities are subject to modest changes in delivery size and coupon.

As of December 31, 2010, our Agency Securities portfolio was purchased at a net premium to par value with a weighted average amortized cost, including settled and forward settle securities, of 104.44%, due to the average interest rates on these securities being higher than prevailing market rates. As of December 31, 2010, we had approximately \$49.6 million of unamortized premium included in the cost basis of our investments, inclusive of both settled and forward settle securities. All unsettled purchases of securities as of December 31, 2010, were settled in January and February 2011. As of December 31, 2010, our investment portfolio of settled securities consisted of Agency Securities as follows:

As of September 30, 2011 and December 31, 2010, the adjustable and hybrid adjustable rate mortgage loans underlying our Agency Securities have fixed-interest rates for an average period of approximately 68 months and 64 months, respectively, after which time the interest rates reset and become adjustable. After a reset date, interest rates on our adjustable and hybrid adjustable Agency Securities float based on spreads over various indices, typically LIBOR or the one-year Constant Maturity Treasury (“CMT”), rate. These interest rates are subject to caps that limit the amount the applicable interest rate can increase during any year, known as an annual cap, and through the maturity of the security, known as a lifetime cap.

Liabilities

We have entered into repurchase agreements to finance most of our Agency Securities. Our repurchase agreements are secured by our Agency Securities and bear interest at rates that have historically moved in close relationship to LIBOR. We have established borrowing relationships with several investment banking firms and other lenders, twenty-four of which we had done repurchase trades with as of September 30, 2011 and eleven of which we had done repurchases trades with as of December 31, 2010. We had outstanding balances under our repurchase agreements at September 30, 2011 and December 31, 2010 of \$5.2 billion and \$1.0 billion, respectively.

Derivative Instruments

We generally intend to hedge as much of our interest rate risk as our manager deems prudent in light of market conditions and the associated costs. No assurance can be given that our derivatives will have the desired beneficial impact on our results of operations or financial condition. We have not elected cash flow hedge accounting treatment under the authoritative guidance. Our policies do not contain specific requirements as to the percentages or amount of interest rate risk that our manager is required to hedge. As we do not designate our hedging activities as cash flow hedges, realized as well as unrealized losses from these transactions will impact our GAAP income.

Use of derivative instruments may fail to protect or could adversely affect us because, among other things:

- available derivatives may not correspond directly with the interest rate risk for which protection is sought;
- the duration of the derivatives may not match the duration of the related liability;
- the party owing money on the derivatives may default on its obligation to pay;
- the credit-quality of the party owing money on the derivatives may be downgraded to such an extent that it impairs our ability to sell or assign our side of the hedging transaction; and
- the value of derivatives may be adjusted from time to time in accordance with accounting rules to reflect changes in fair value; downward adjustments, or “mark-to-market losses,” would reduce our net income or increase any net loss.

As of September 30, 2011 and December 31, 2010, we had interest rate swap contracts with an aggregate notional balance of \$2.8 billion and \$155.0 million, respectively. In addition, as of September 30, 2011 and December 31, 2010, we had entered into \$134.0 million and \$214.0 million (notional amount), respectively, of Eurodollar Futures strips (“interest rate swap equivalents”) traded in 1,167 and 2,361 individual Eurodollar Futures Contracts (“Futures Contracts”) transactions, respectively. Futures Contracts are traded on the Chicago Mercantile Exchange (“CME”). Counterparty risk of interest rate swap contracts and Futures Contracts are limited to some degree because of daily mark-to-market and collateral requirements. In addition, substantial credit support for the Futures Contracts is provided by the CME. These transactions are designed to lock in some funding costs for financing activities associated with our assets in such a way as to help assure the realization of attractive net interest margins and to vary inversely in value with our Agency Securities. Such contracts are based on assumptions about prepayments which, if not realized, will cause results to differ from expectations.

Results of Operations

Three and Nine Months Ended September 30, 2011, Compared to Three and Nine Months Ended September 30, 2010

We commenced our operations in November 2009, upon completion of the merger with Enterprise. We continued to raise equity capital during the nine months ended September 30, 2011, issuing 56,424,930 shares of common stock and raising additional net common equity of approximately \$402.6 million. In addition, we issued 11,879,844 shares under the Dividend Reinvestment and Stock Purchase Plan for net proceeds of \$86.8 million. These changes were material to our company and significantly affect the results we report. We believed that the timing for additional investment, in both assets and liabilities, was appropriate and beneficial to our long-term performance. In addition, there are economies of scale that also are reached as our managed assets grow. As we invest the proceeds of our offerings, we are methodical, at times purchasing our assets with forward settlements up to 90 days out, in order to minimize purchase price. This means that our earnings, particularly on a per share basis, may take time to reach a level which we consider to be indicative of a full run-rate. This also means that some quarterly comparisons will not be meaningful or may be misleading.

Our net interest income for the three and nine months ended September 30, 2011, was \$36.2 million and \$75.1 million, respectively, compared to \$3.5 million and \$5.8 million for the three and nine months ended September 30, 2010, respectively. As of September 30, 2011, our Agency Securities portfolio consisted of \$6.0 billion of securities, including \$474.1 million of current carrying value of forward settle security sales. As of December 31, 2010, our Agency Securities portfolio consisted of \$1.2 billion of securities, including \$125.3 million of current carrying value of forward settle security sales.

The following table presents the components of the yield earned on our Agency Security portfolio:

Quarter Ended	Asset Yield	Cost of Funds	Net Interest Margin	Interest Expense on Repurchase Agreements
September 30, 2011	3.11%	0.93%	2.18%	0.27%
June 30, 2011	3.35	0.99	2.36	0.28
March 31, 2011	3.20	0.80	2.40	0.33
December 31, 2010	3.42	0.47	2.95	0.34
September 30, 2010	3.32	0.44	2.88	0.27
June 30, 2010	2.98	0.37	2.61	0.30
March 31, 2010	3.06	0.38	2.68	0.27
December 31, 2009	4.59	0.72	3.86	0.26

The yield on our assets is most significantly affected by the rate of repayments on our Agency Securities. Our rate of portfolio repayment for the three and nine months ended September 30, 2011, was 12.4% and 11.1%, respectively, on a Constant Prepayment Basis (“CPR”) compared to 11.1% and 13.7% for the three and nine months ended September 30, 2010, respectively.

As of September 30, 2011, our Agency Securities portfolio was purchased at a net premium to par value with a weighted average amortized cost, including settled and forward settle securities, of 104.17%, due to the average interest rates on these securities being higher than prevailing market rates.

The main indicator of our borrowing costs is 30-day LIBOR, which generally closely parallels the rates we pay on our repurchase agreements. LIBOR was 0.24% at September 30, 2011. During the three and nine months ended September 30, 2011, we realized losses of \$8.4 million and \$16.4 million related to our derivatives, respectively. During the three and nine months ended September 30, 2010, we realized losses of \$0.2 million and \$0.2 million, respectively. We decreased our total Eurodollar Future strips notional amount from \$214.0 million at December 31, 2010, to \$134.0 million at September 30, 2011, with a weighted average swap equivalent rate of 1.8% and weighted average term of 31 months. In addition, during the period ended September 30, 2011, we increased our total interest rate swap contracts aggregate notional balance from \$155.0 million to \$2.8 billion with, a weighted average swap rate of 1.5% and a weighted average term of 49 months.

Our total operating expenses for the three and nine months ended September 30, 2011, were \$2.9 million and \$6.4 million, respectively, as compared to \$0.4 million and \$1.2 million, respectively, for the three and nine months ended September 30, 2010. The respective period increases are a combination of increased management fees related to our successful equity capital raising initiatives as well as increased professional fees and operating costs to support our current portfolio.

Our primary source of income is the interest income we earn on our investment portfolio. Our net loss for the three and nine months ended September 30, 2011 was (\$34.5) million and (\$33.1) million, respectively, or (\$0.44) and (\$0.63), per weighted average share, respectively. These results compare to a net loss of (\$0.5) million and (\$0.9) million or (\$0.06) and (\$0.20), per weighted average share, respectively, for the three and nine months ended September 30, 2010. The main drivers of the difference were the increased equity capital resources from 2010 through the period ended September 30, 2011 and the implementation of our investment strategy, offset by unrealized losses from our derivatives and increasing management fees. As discussed elsewhere in this document, management fees are calculated on gross equity raised, therefore, as we complete additional equity offerings, the management fee expense will continue to increase.

We have negative retained earnings (titled "Accumulated deficit" in the stockholders' equity section of our accompanying condensed consolidated balance sheets) as of September 30, 2011, due to the consequences of our tax qualification as a REIT. Our dividends are based on our REIT taxable income, as determined for federal income tax purposes, and not our net income computed in accordance with GAAP as reported in our condensed consolidated financial statements. Accordingly, we may be required to pay out more in dividends than we have earned on a GAAP basis.

For the three and nine months ended September 30, 2011, our estimated REIT taxable income was approximately \$31.3 million and \$58.8 million, respectively. The most significant difference was the unrealized loss on derivatives which is reflected in GAAP earnings but does not reduce REIT taxable income.

Liquidity and Capital Resources

Our primary sources of funds are borrowings under repurchase arrangements, monthly principal and interest payments on our investments and cash generated from our operating results. Other sources of funds may include proceeds from equity and debt offerings and asset sales. We generally maintain liquidity to pay down borrowings under repurchase arrangements to reduce borrowing costs and otherwise efficiently manage our long-term investment capital. Because the level of these borrowings can be adjusted on a daily basis, the level of cash and cash equivalents carried on our balance sheet is significantly less important than our potential liquidity available under our borrowing arrangements. We currently believe that we have sufficient liquidity and capital resources available for the acquisition of additional investments, repayments on borrowings and the payment of cash dividends as required for continued qualification as a REIT.

Our primary uses of cash are to purchase Agency Securities, pay interest and principal on our borrowings, fund our operations and pay dividends. During the period ended September 30, 2011, we purchased \$5.7 billion current face amount of Agency Securities using proceeds from the equity raises, repurchase agreements, principal repayments and cash. During the period ended September 30, 2011, we received cash of \$426.5 million from prepayments and scheduled principal payments on our investment securities and we received net proceeds of \$489.4 million from equity issuances including dividend reinvestment and stock purchase plan. We had a net cash increase from our repurchase agreements of \$4.2 billion for the period ended September 30, 2011. We made cash interest payments of approximately \$5.8 million on our borrowings for nine months ended September 30, 2011. Part of funding our operations includes providing cash margin to offset liability balances on our derivatives. This required an additional \$125.2 million of cash to be maintained in a restricted account with our counterparties as of the nine months ended September 30, 2011. If rates increase over time, we may recover some or all of this cash.

In response to the growth of our Agency Securities portfolio and to the relatively weak financing market, we have continued to pursue additional lending counterparties in order to help increase our financial flexibility and ability to withstand periods of contracting liquidity in the credit markets. Currently, we have Master Repurchase Agreements (“MRAs”), which are uncommitted repurchase facilities, with twenty-nine lending counterparties to finance our portfolio, subject to certain conditions, and have borrowings outstanding with twenty-four of these counterparties.

Dividends

On January 28, 2011, a cash dividend of \$0.12 per common share, or \$2.0 million in the aggregate, was paid to holders of record on January 15, 2011. This amount included \$0.02 per common share of taxable income related to the year ended December 31, 2010.

On February 25, 2011, a cash dividend of \$0.12 per common share, or \$3.9 million in the aggregate, was paid to holders of record on February 15, 2011.

On March 30, 2011, a cash dividend of \$0.12 per common share, or \$3.9 million in the aggregate, was paid to holders of record on March 15, 2011.

On April 28, 2011, a cash dividend of \$0.12 per common share, or \$5.9 million in the aggregate, was paid to holders of record on April 15, 2011.

On May 27, 2011, a cash dividend of \$0.12 per common share, or \$5.9 million in the aggregate, was paid to holders of record on May 15, 2011.

On June 29, 2011, a cash dividend of \$0.12 per common share, or \$8.3 million in the aggregate, was paid to holders of record on June 15, 2011.

On July 28, 2011, a cash dividend of \$0.12 per common share, or \$9.1 million in the aggregate, was paid to holders of record on July 15, 2011.

On August 30, 2011, a cash dividend of \$0.12 per common share, or \$9.1 million in the aggregate, was paid to holders of record on August 15, 2011.

On September 29, 2011, a cash dividend of \$0.12 per common share, or \$10.1 million in the aggregate, was paid to holders of record on September 15, 2011.

Our Board will continue to evaluate our dividend policy each quarter and will make adjustments as necessary, based on a variety of factors, including, among other things, the need to maintain our REIT status, our financial condition, liquidity, earnings projections and business prospects. Our dividend policy does not constitute an obligation to pay dividends, which only occurs when our Board declares a dividend.

We intend to make distributions to our stockholders to comply with the various requirements to maintain our REIT status and to minimize corporate income tax and the nondeductible excise tax. However, REIT taxable income is calculated according to the requirements of the Code rather than GAAP which can cause differences between GAAP income reported by us and taxable income calculated to determine distribution requirements to stockholders. These differences are primarily due to non-taxable unrealized changes in the value of our derivatives. These differences may be large and can be either positive or negative variances from GAAP income. In addition, differences in timing between the recognition of REIT taxable income and the actual receipt of cash could require us to sell assets or to borrow funds on a short-term basis to meet the REIT distribution requirements and to minimize corporate income tax and the nondeductible excise tax.

Equity Capital Raising Activities

On January 26, 2011, we completed an underwritten secondary public offering of 6,000,000 shares of common stock at a price of \$7.55 per share. The underwriters fully exercised the over-allotment option for 900,000 additional shares. Net proceeds were \$49.0 million, net of issuance costs of approximately \$3.1 million.

On February 8, 2011, we completed an underwritten secondary public offering of 7,750,000 shares of common stock at a price of \$7.60 per share. The underwriters fully exercised the over-allotment option for 1,162,500 additional shares. Net proceeds were \$64.0 million, net of issuance costs of approximately \$3.7 million.

On February 28, 2011, we entered into an equity distribution agreement with JMP Securities LLC and Ladenburg Thalmann & Co. Inc. to offer and sell from time to time up to 6,500,000 shares of our common stock in at-the-market transactions. As of September 30, 2011, we had issued and sold 5,212,430 shares of our common stock under this agreement for net proceeds of \$37.5 million.

On April 7, 2011, we implemented a Dividend Reinvestment and Stock Purchase Plan through which investors may purchase additional shares of our common stock by reinvesting some or all of the cash dividends received on shares of our common stock. Shareholders may also make optional cash purchases of shares of our common stock subject to certain limitations detailed in the plan prospectus. As of September 30, 2011 we had issued and sold 11,879,844 shares under the plan for net proceeds of \$86.8 million.

On April 13, 2011, we completed an underwritten secondary public offering of 16,000,000 shares of common stock at a price of \$7.40 per share. The underwriters partially exercised the over-allotment option for 1,000,000 additional shares. Net proceeds were \$121.1 million, net of issuance costs of approximately \$4.7 million.

On June 6, 2011, we completed an underwritten secondary public offering of 16,000,000 shares of common stock at a price of \$7.40 per share. The underwriters fully exercised the over-allotment option for 2,400,000 additional shares. Net proceeds were \$131.0 million, net of issuance costs of approximately \$5.2 million.

Off-Balance Sheet Arrangements

As of September 30, 2011 and December 31, 2010, we did not maintain any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance, or special purpose or variable interest entities, established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. Further, as of September 30, 2011 and December 31, 2010, we had not guaranteed any obligations of any unconsolidated entities or entered into any commitment or intent to provide funding to any such entities.

Liquidity Sources—Repurchase Facilities

At September 30, 2011, our repurchase agreements had the following counterparties, amount at risk and weighted average remaining maturities:

Repurchase Agreement Counterparties	Amount Outstanding	Amount at Risk (1)	Weighted Average Maturity of Repurchase Agreements in Days	Percent of Total Amount Outstanding
BNP Paribas Securities Corp.	\$ 422,786,000	\$ 16,169,847	36	8.1%
MF Global Inc.	331,932,000	15,640,763	35	6.4
Goldman Sachs & Company	325,919,000	15,638,846	25	6.2
UBS Securities LLC	325,228,000	16,172,127	26	6.2
Guggenheim Liquidity Securities, LLC	323,983,000	15,656,042	47	6.2
South Street Securities, LLC	290,131,444	17,406,562	46	5.5
Mitsubishi UFJ Securities (USA)	285,727,000	13,470,747	35	5.5
Merrill Lynch, Pierce, Fenner & Smith Inc.	274,302,000	10,351,846	20	5.2
Cantor Fitzgerald & Co.	271,736,000	16,739,202	5	5.2
Citigroup Global Markets Inc.	245,286,000	12,175,704	70	4.7
RBS Securities Inc.	243,587,800	11,846,208	11	4.7
J.P. Morgan Securities LLC	231,782,000	11,372,121	41	4.4
Pierpont Securities LLC	222,168,000	8,653,392	28	4.3
Nomura Securities International, Inc.	216,941,000	11,648,240	20	4.2
ING Financial Markets LLC	205,354,000	10,166,744	7	3.9
Deutsche Bank Securities Inc.	174,983,500	8,520,325	11	3.4
Daiwa Securities America Inc.	148,866,000	7,918,325	37	2.9
CRT Capital Group LLC	123,433,500	7,964,598	11	2.4
Mizuho Securities USA Inc.	116,547,000	4,997,972	32	2.2
Credit Suisse Securities (USA) LLC	107,278,096	4,512,181	14	2.0
ICBC Financial Services LLC (2)	95,900,000	4,647,395	38	1.8
Jefferies and Company, Inc.	94,140,000	4,324,100	18	1.8
Barclays Capital Inc.	76,014,000	3,263,715	39	1.5
Wells Fargo Bank, N.A.	67,500,000	3,598,069	17	1.3
Total	\$ 5,221,525,340	\$ 252,855,071		100.0%

(1) Equal to the fair value of securities sold, minus the sum of repurchase agreement liabilities plus accrued interest expense.

(2) Industrial and Commercial Bank of China Financial Services LLC

(3)

At December 31, 2010, our repurchase agreements had the following counterparties, amount at risk and weighted average remaining maturities:

Repurchase Agreement Counterparties	Amount Outstanding	Amount at Risk (1)	Weighted Average Maturity of Repurchase Agreements in Days	Percent of Total Amount Outstanding
Guggenheim Liquidity Securities, LLC	\$ 141,026,000	\$ 4,425,424	56	14.5%
South Street Securities, LLC	135,297,000	6,204,002	29	13.9
Goldman Sachs & Company	132,638,000	6,424,071	19	13.7
MF Global Inc.	127,809,000	4,197,001	56	13.2
Cantor Fitzgerald & Co.	111,982,000	7,658,536	16	11.5
Nomura Securities International, Inc.	95,228,000	2,037,191	40	9.8
RBS Securities Inc.	86,535,658	4,774,360	18	8.9
UBS Securities LLC	46,535,000	2,805,301	27	4.8
Mizuho Securities USA Inc.	39,826,000	1,593,285	10	4.0
Jefferies and Company, Inc.	31,822,000	426,829	10	3.3
Daiwa Securities America Inc.	22,977,000	1,690,799	18	2.4
Total	<u>\$ 971,675,658</u>	<u>\$ 42,236,799</u>		<u>100.0%</u>

(1) Equal to the fair value of securities sold, minus the sum of repurchase agreement liabilities plus accrued interest expense

As of September 30, 2011, the weighted average margin requirement, or the percentage amount by which the collateral value must exceed the loan amount, which we also refer to as the haircut, under all our repurchase agreements was approximately 5.1%. As of December 31, 2010, the weighted average margin requirement, under all our repurchase agreements was approximately 5.3%. Declines in the value of our Agency Securities portfolio can trigger margin calls by our lenders under our repurchase agreements. An event of default or termination event under the standard MRA would give our counterparty the option to terminate all repurchase transactions existing with us and require any amount due to be payable immediately.

As discussed above under “Market and Interest Rate Trends and the Effect on our Portfolio,” the residential mortgage market in the United States has recently experienced difficult economic conditions including:

- increased volatility of many financial assets, including Agency Securities and other high-quality RMBS assets;
- increased volatility and deterioration in the broader residential mortgage and RMBS markets; and
- significant disruption in financing of RMBS.

While conditions have improved, should there be a reoccurrence of difficulties in the residential mortgage market, our lenders may be forced to exit the repurchase market, become insolvent or further tighten lending standards or increase the amount of required equity capital or haircut, any of which could make it more difficult or costly for us to obtain financing.

Effects of Margin Requirements, Leverage and Credit Spreads

Our Agency Securities have values that fluctuate according to market conditions and, as discussed above, the market value of our Agency Securities will decrease as prevailing interest rates or credit spreads increase. When the value of the securities pledged to secure a repurchase loan decreases to the point where the positive difference between the collateral value and the loan amount is less than the haircut, our lenders may issue a margin call, which means that the lender will require us to pay the margin call in cash or pledge additional collateral to meet that margin call. Under our repurchase facilities, our lenders have full discretion to determine the value of the Agency Securities we pledge to them. Most of our lenders will value securities based on recent trades in the market. Lenders also issue margin calls as the published current principal balance factors change on the pool of mortgages underlying the securities pledged as collateral when scheduled and unscheduled principal repayments are announced monthly.

We experience margin calls in the ordinary course of our business, and under certain conditions, such as during a period of declining market value for Agency Securities, we may experience margin calls monthly or more frequently. In seeking to manage effectively the margin requirements established by our lenders, we maintain a position of cash and unpledged securities. We refer to this position as our liquidity. The level of liquidity we have available to meet margin calls is directly affected by our leverage levels, our haircuts and the price changes on our securities. If interest rates increase as a result of a yield curve shift or for another reason or if credit spreads widen, the prices of our collateral (and our unpledged assets that constitute our liquidity) will decline and we may experience margin calls. We will use our liquidity to meet such margin calls. There can be no assurance that we will maintain sufficient levels of liquidity to meet any margin calls. If our haircuts increase, our liquidity will proportionately decrease. If we increase our borrowings, our liquidity will decrease by the amount of additional haircut on the increased level of indebtedness. In addition, certain of our MRAs contain a restriction that prohibits our leverage from exceeding twelve times our stockholders' equity as well as termination events in the case of significant reductions in equity capital.

We intend to maintain a level of liquidity in relation to our assets that enables us to meet reasonably anticipated margin calls but that also allows us to be substantially invested in Agency Securities. We may misjudge the appropriate amount of our liquidity by maintaining excessive liquidity, which would lower our investment returns, or by maintaining insufficient liquidity, which would force us to liquidate assets into unfavorable market conditions and harm our results of operations and financial condition.

Forward-Looking Statements Regarding Liquidity

Based on our current portfolio, leverage rate and available borrowing arrangements, we believe that our common equity, combined with cash flow from operations and available borrowing capacity, will be sufficient to enable us to meet anticipated short-term (one year or less) liquidity requirements such as to fund our investment activities, pay fees under our management agreement, fund our distributions to shareholders and general corporate expenses.

Our ability to meet our long-term (greater than one year) liquidity and capital resource requirements will be subject to obtaining additional debt financing and/or equity capital. We may increase our capital resources by obtaining long-term credit facilities or making public or private offerings of equity or debt securities, possibly including classes of preferred stock, common stock, and senior or subordinated notes. Such financing will depend on market conditions for capital raises and for the investment of any proceeds. If we are unable to renew, replace or expand our sources of financing on substantially similar terms, it may have an adverse effect on our business and results of operations.

We generally seek to borrow (on a recourse basis) between six and ten times the amount of our shareholders' equity, although we are not limited to that range. At September 30, 2011 and December 31, 2010, our total borrowings were approximately \$5.2 billion and \$1.0 billion (excluding accrued interest), respectively, which represented a leverage ratio of approximately 9.09:1 and 8.94:1, respectively.

Critical Accounting Policies

A summary of our critical accounting policies is included in Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2010. There have been no significant changes to those policies during 2011.

Inflation

Virtually all of our assets and liabilities are interest rate-sensitive in nature. As a result, interest rates and other factors influence our performance far more than inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. Our financial statements are prepared in accordance with GAAP and any distributions we may make will be determined by our Board based in part on our REIT taxable income as calculated according to the requirements of the Code; in each case, our activities and balance sheet are measured with reference to fair value without considering inflation.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We seek to manage our risks related to the credit-quality of our assets, interest rates, liquidity, prepayment speeds and market value while, at the same time, seeking to provide an opportunity to shareholders to realize attractive risk-adjusted returns through ownership of our capital stock. While we do not seek to avoid risk completely, we believe the risk can be quantified from historical experience and seek to actively manage that risk, to earn sufficient compensation to justify taking those risks and to maintain capital levels consistent with the risks we undertake.

Interest Rate, Cap, and Mismatch Risk

We invest in adjustable rate, hybrid and fixed rate Agency Securities. Hybrid mortgages are adjustable rate mortgages (“ARMs”) that have a fixed-interest rate for an initial period of time (typically three years or greater) and then convert to an adjustable rate for the remaining loan term. Our debt obligations are generally repurchase agreements of limited duration that are periodically refinanced at current market rates.

ARM-related assets are typically subject to periodic and lifetime interest rate caps that limit the amount an ARM-related asset’s interest rate can change during any given period. ARM securities are also typically subject to a minimum interest rate payable. Our borrowings are not subject to similar restrictions. Hence, in a period of increasing interest rates, interest rates on our borrowings could increase without limitation, while the interest rates on our mortgage-related assets could be limited. This problem would be magnified to the extent we acquire Agency Securities that are not fully indexed. Further, some ARM-related assets may be subject to periodic payment caps that result in some portion of the interest being deferred and added to the principal outstanding. These factors could lower our net interest income or cause a net loss during periods of rising interest rates, which would negatively impact our liquidity, net income and our ability to make distributions to stockholders.

We fund the purchase of a substantial portion of our ARM-related assets with borrowings that have interest rates based on indices and repricing terms similar to, but of shorter maturities than, the interest rate indices and repricing terms of our mortgage assets. Thus, we anticipate that in most cases the interest rate indices and repricing terms of our mortgage assets and our funding sources will not be identical, thereby creating an interest rate mismatch between assets and liabilities. During periods of changing interest rates, such interest rate mismatches could negatively impact our net interest income, dividend yield and the market price of our common stock. Most of our adjustable rate assets are based on the one-year CMT rate and the one-year LIBOR rate and our debt obligations are generally based on LIBOR. These indices generally move in the same direction, but there can be no assurance that this will continue to occur.

Our ARM-related assets and borrowings reset at various different dates for the specific asset or obligation. In general, the repricing of our debt obligations occurs more quickly than on our assets. Therefore, on average, our cost of funds may rise or fall more quickly than does our earnings rate on the assets.

Further, our net income may vary somewhat as the spread between one-month interest rates, the typical term for our repurchase agreements and six-month and twelve-month interest rates, the typical reset term of adjustable rate Agency Securities, varies.

Prepayment Risk

As we receive repayments of principal on our Agency Securities from prepayments and scheduled payments, premiums paid on such securities are amortized against interest income and discounts are accreted to interest income as realized. Premiums arise when we acquire Agency Securities at prices in excess of the principal balance of the mortgage loans underlying such Agency Securities. Conversely, discounts arise when we acquire Agency Securities at prices below the principal balance of the mortgage loans underlying such Agency Securities. To date, all of our Agency Securities have been purchased at a premium.

Interest Rate Risk and Effect on Market Value Risk

Another component of interest rate risk is the effect changes in interest rates will have on the market value of our Agency Securities. We face the risk that the market value of our Agency Securities will increase or decrease at different rates than that of our liabilities, including our hedging instruments.

We primarily assess our interest rate risk by estimating the effective duration of our assets and the effective duration of our liabilities and by estimating the time difference between the interest rate adjustment of our assets and the interest rate adjustment of our liabilities. Effective duration essentially measures the market price volatility of financial instruments as interest rates change. We generally estimate effective duration using various financial models and empirical data. Different models and methodologies can produce different effective duration estimates for the same securities.

The sensitivity analysis tables presented below reflects the estimated impact of an instantaneous parallel shift in the yield curve, up and down 50 and 100 basis points, on the market value of our interest rate-sensitive investments and net interest income, at September 30, 2011 and December 31, 2010, assuming a static portfolio. When evaluating the impact of changes in interest rates, prepayment assumptions and principal reinvestment rates are adjusted based on our manager’s expectations. The analysis presented utilized assumptions, models and estimates of the manager based on the manager’s judgment and experience.

As of September 30, 2011

<u>Change in Interest Rates</u>		<u>Percentage Change in Projected Net Interest Income</u>		<u>Percentage Change in Projected Portfolio Value Including Derivatives</u>	
1.00	%	2.57	%	(0.05)	%
0.50		4.64		0.15	
(0.50)		(7.16)		(0.67)	
(1.00)		(20.43)		(1.92)	

As of December 31, 2010

<u>Change in Interest Rates</u>		<u>Percentage Change in Projected Net Interest Income</u>		<u>Percentage Change in Projected Portfolio Value Including Derivatives</u>	
1.00	%	(19.58)	%	(2.40)	%
0.50		(11.55)		(1.12)	
(0.50)		5.35		0.93	
(1.00)		(1.14)		1.70	

While the table above reflects the estimated immediate impact of interest rate increases and decreases on a static portfolio, we rebalance our portfolio from time to time either to seek to take advantage of or reduce the impact of changes in interest rates. It is important to note that the impact of changing interest rates on market value and net interest income can change significantly when interest rates change beyond 100 basis points from current levels. Therefore, the volatility in the market value of our assets could increase significantly when interest rates change beyond amounts shown in the table above. In addition, other factors impact the market value of and net interest income from our interest rate-sensitive investments and hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, interest income would likely differ from that shown above, and such difference might be material and adverse to our shareholders.

The above table quantifies the potential changes in net interest income and portfolio value, which includes the value of our derivatives, should interest rates immediately change. Given the low level of interest rates at September 30, 2011 and December 31, 2010, we applied a floor of 0% for all anticipated interest rates included in our assumptions. Due to the presence of this floor, it is anticipated that any hypothetical interest rate decrease would have a limited positive impact on our funding costs beyond a certain level; however, because prepayments speeds are unaffected by this floor, it is expected that any increase in our prepayment speeds (occurring as a result of any interest rate decrease or otherwise) could result in an acceleration of our premium amortization and the reinvestment of such prepaid principal in lower yielding assets. As a result, the presence of this floor limits the positive impact of any interest rate decrease on our funding costs. Therefore, at some point, hypothetical interest rate decreases could cause the fair value of our financial instruments and our net interest income to decline.

Market Value Risk

All of our Agency Securities are classified as available for sale assets. As such, they are reflected at fair value (i.e., market value) with the periodic adjustment to fair value (that is not considered to be an other than temporary impairment) reflected as part of "Accumulated other comprehensive income (loss)" that is included in the equity section of our condensed consolidated balance sheet. The market value of our assets can fluctuate due to changes in interest rates and other factors. Weakness in the mortgage market may adversely affect the performance and market value of our investments. This could negatively impact our net book value. Furthermore, if our lenders are unwilling or unable to provide additional financing, we could be forced to sell our Agency Securities at an inopportune time when prices are depressed. The principal payments are guaranteed by Freddie Mac, Fannie Mae, or Ginnie Mae on our Agency Securities.

Liquidity Risk

Our primary liquidity risk arises from financing long-maturity Agency Securities with short-term debt. The interest rates on our borrowings generally adjust more frequently than the interest rates on our adjustable rate Agency Securities. Accordingly, in a period of rising interest rates, our borrowing costs will usually increase faster than our interest earnings from Agency Securities.

Credit Risk

We have limited our exposure to credit losses on our portfolio of Agency Securities by only purchasing securities issued by Freddie Mac, Fannie Mae or Ginnie Mae. The payment of principal and interest on the Freddie Mac and Fannie Mae Agency Securities are guaranteed by those respective agencies and the payment of principal and interest on the Ginnie Mae Agency Securities are backed by the full faith and credit of the U.S. Government.

Item 4. Controls and Procedures

Our management, including our Co-Chief Executive Officer (the CEO) and Chief Financial Officer (the CFO), reviewed and evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act) as of the end of the period covered by this quarterly report. Based on that review and evaluation, the CEO and CFO have concluded that our current disclosure controls and procedures, as designed and implemented, (1) were effective in ensuring that information regarding us and our subsidiaries is accumulated and communicated to our management, including our CEO and CFO, by our employees, as appropriate to allow timely decisions regarding required disclosure and (2) were effective in providing reasonable assurance that information we must disclose in our periodic reports under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods prescribed by the Securities and Exchange Commission's rules and forms.

There have been no changes in our internal controls over financial reporting that occurred during the three and nine month periods ended September 30, 2011, that have materially affected, or are reasonably likely to affect our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Our company and our manager are not currently subject to any legal proceedings.

Item 1A. Risk Factors

Except as provided below, there have been no material changes from the risk factors disclosed in the "Risk Factors" section of our Annual Report on Form 10-K filed on March 10, 2011 with the SEC.

Our Annual Report on Form 10-K filed on March 10, 2011 with the SEC included a risk factor titled "*Maintenance of our exemption from the 1940 Act will impose limits on our business.*" The following is additional information to accompany such risk factor.

The SEC recently solicited public comment via a Concept Release on a wide range of issues relating to the Section 3(c)(5)(C) exemption from the 1940 Act, including the nature of the assets that qualify for purposes of the exemption and whether mortgage-related REITs should be regulated as investment companies. There can be no assurance that the laws and regulations governing the 1940 Act status of REITs, including guidance and interpretations from the Division of Investment Management of the SEC regarding the Section 3(c)(5)(C) exemption, will not change in a manner that adversely affects our operations or business.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Removed and Reserved

Item 5. Other Information

None.

Item 6. Exhibits

See Exhibit Index.

SIGNATURES

Pursuant to the requirements of the Securities and Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

** Incorporated by reference to Exhibit 3.1 to ARMOUR's Current Report on Form 8-K filed with the SEC on August 8, 2011.

*** Incorporated by reference to Exhibit 10.1 to ARMOUR's Registration Statement on form S-8 filed with the SEC on July 22, 2011.

**** Filed herewith.

Certification Pursuant to 18 U.S.C Section 1350, Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

I, Scott J. Ulm, Co-Chief Executive Officer of ARMOUR Residential REIT, Inc., certify that

1. I have reviewed this quarterly report on Form 10-Q for the period ended September 30, 2011 of ARMOUR Residential REIT, Inc. (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its condensed consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting
